completed. Programming has finished programming the drive trains for the intake and is currently working on finishing programming the hanging mechanism. CAD is currently finishing making designs for the prototypes for the robot. Field Build is finishing building the set, which will help us practice driving our robot shortly.

Business Update

The Business teams are currently working on various awards for our competitions. The Business Planning subteam is finalizing the business plan and updating information within our presentation slides. We are also practicing answering questions for the entrepreneurship award. Imagery is working on covers for the business plan and the summary. They are also working on pit posters and decals for the cart. PR is working on the February Newsletter and continuing blog posts. Photo/Video is creating scripts for the Chairman's

Our team operates year-round, so we are appreciative of all donations, whether they are monetary or in-kind donations. If you would like to contribute, please contact us at:

theadambots@gmail.com

Examples include internships, welding mentors, build space, etc.

and submitted it. Chairmans are starting to work on their presentation with the competition coming up. Digital Media is uploading pictures from the science fair and other recent events that need to be uploaded to our website.

Outreach Update

We demoed our robot at Long Meadow this past Monday (February 7th). We explained our robot to the children while switching the batteries. We also shot balls out to them and they rolled the balls back into the robot. We are excited about the prospect of future AdamBots and enjoy showing our community our robots.
